

Task:	0 – Not Proficient	1 – Partially Proficient	2 – Fully Proficient	Notes
Tool Placement Exercise 1				
Assemble hood stand properly.				
Clean/polish hood.				
Choose appropriate dent rod for each 2-inch circle.				Select tool based on distance.
Walk tool tip across circle with leverage point (S-Hook and Panel Lever).				Leverage point should be at half-way point of tool.
Use appropriate tool pressure to create a high spot.				
Check and reposition Dent Light.				Light too close will wash out the exercise.
Scan the reflection.				
Use appropriate tool pressure.
