

Task:	0 – Not Proficient	1 – Partially Proficient	2 – Fully Proficient	Notes
<b>Tool Placement Exercise 2</b>				
Assemble hood stand properly.				
Clean/polish hood.				
Attach dent light in proper location.				
Choose appropriate dent rod for each 1-inch circle.				Select tool based on distance.
Walk tool tip across circle with S-hook.				Leverage point should be at half-way point of tool.
Use appropriate tool pressure to create a high spot.				
Check and reposition Dent Light.				Light too close will wash out the exercise.
Scan the reflection.
