

Performance Task Module D

Task:	0 – Not Proficient	1 – Partially Proficient	2 – Fully Proficient	Notes
<b>Removing High Spots Exercise</b>				
Tapping down with correct pressure.				Start light pressure to start.
Check high spot after each tap impact.				Ensure high point is moving with tap.
Correct placement of knockdown tool on tip of high spot and straight (perpendicular) to the panel.				If not straight knockdown tool will slip. Correct placement is where dark and light meet.
Check and reposition Dent Light.				
Scan the reflection.
